PROFESSIONAL SUMMARY

Flutter Developer with 3 years of hands-on experience building and maintaining production mobile applications for Android and iOS across e-commerce, SaaS, real-time communication, and business applications. Experienced in Flutter & Dart, BLoC/Cubit, Clean Architecture, REST APIs, WebSockets, Firebase, payment integrations, CI/CD, and mobile app deployment. Comfortable working across the product lifecycle, from architecture and implementation to debugging, optimization, testing, and production releases. Focused on building scalable, maintainable applications that deliver reliable user experiences and real business value.

PROFESSIONAL EXPERIENCE

Mobile Software Engineer

Tqnia IT Company | Full-time · Performance Recognition  · Experience Certificate 

Oct 2024 - Sep 2026

- Develop and maintain production Flutter applications across multiple business domains.
- Design and implement scalable application architecture.
- Integrate REST APIs, WebSockets, Firebase services, payment gateways, and third-party SDKs.
- Automated build and release workflows using GitHub Actions and Shorebird.
- Collaborate with product, backend, design, and QA teams throughout development and release cycles.
- Support production releases, troubleshooting, and continuous product improvements.

Mobile Application Developer (Flutter)

Behiry Perfume | Personal Product · behiryperfume.com 

Feb 2024 – Present

- Built and maintained a production e-commerce mobile application for a real-world fragrance business.
- Led the digital transformation from product validation and UX to development, and deployment.
- Designed application architecture and user experiences across mobile and web platforms.
- Implemented product catalog, categories, cart, checkout, and customer-facing e-commerce flows.
- Managed releases, roadmap priorities, and product improvements based on business needs.
- Worked across development, design, backend coordination, marketing, and business operations.

Mobile Engineer

Webbing Agency | Full-time transition to Part-time · Best Employee of the Month 

Aug 2024 – Feb 2025

- Developed production multi-vendor e-commerce and logistics applications.
- Implemented order tracking and logistics-related user flows.
- Built responsive interfaces and improved application behavior across different devices.
- Collaborated with cross-functional teams to deliver features from implementation through release.
- Contributed to performance improvements and production issue resolution.

FEATURED PROJECTS

Shopsiia — Multi-Vendor E-Commerce Marketplace

- Built a multi-vendor shopping app for iOS and Android with Arabic/English localization, LTR/RTL support, and light/dark themes, enabling customers to browse products from multiple sellers.
- Implemented the full commerce journey: category browsing, search with filters, product variants and tiered pricing, cart, checkout, order tracking, and returns.
- Designed a guest-first flow where shoppers browse and add to cart without an account, with the guest cart merged into their account on sign-in.

Home & Car — Multi-Service On-Demand Marketplace

Available on Google Play Store [🔗](#) & Apple App Store [🔗](#).

- Built a dual-role marketplace app connecting customers with service providers (drivers & handymen) for home maintenance, car services, and intercity trips
- Implemented real-time live location tracking with background GPS via foreground services
- Built a real-time bidding system where providers submit competitive price offers over WebSockets
- Integrated in-app chat, Firebase FCM push notifications, and Google Maps / Mapbox routing
- Developed a digital wallet with Fawaterak payment gateway, card tokenization
- Integrated Facebook App Events & TikTok Events SDK behind a unified analytics facade
- Delivered full Arabic/English localization with RTL support and over-the-air updates via Shorebird

Let's – Real-Time Chat Application

Available on Google Play Store [🔗](#) & Apple App Store [🔗](#).

- Built real-time chat system (private, group, public chats)
- Integrated Agora SDK for audio/video calls
- Implemented Firebase FCM push notifications
- Built QR-based deep linking system for direct chat navigation
- Implemented real-time live location sharing between users

Salasa CRM — SaaS Multi-Tenant System

- CRM for freelancers and small businesses, built and launched from scratch: offline-first architecture with background sync, role based access control, and a Spring Boot + PostgreSQL backend serving both web and mobile.

Additional Projects

- Worked on numerous production Android & iOS Flutter applications across e-commerce, SaaS, healthcare, real-time communication, maps & location, driver/logistics, and business applications.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Android/iOS Platform Integration

State Management: BLoC, Cubit, Provider, GetX, Riverpod

Architecture: Clean Architecture, MVVM, SOLID

Backend & APIs: REST APIs, WebSockets, Spring Boot, Node JS, PostgreSQL, MySQL

Firebase: Authentication, FCM, Crashlytics, Remote Config, Firestore

Local Storage: SQLite, Hive, SharedPreferences, Flutter Secure Storage

Payments: Stripe, PayPal, MyFatoorah, Paymob, Fawaterk, Payment Gateway Integration

Maps & Location: Google Maps, Location Services, Mapbox Routing

Testing: Unit Testing, Widget Testing, Integration Testing

CI/CD & Deployment: GitHub Actions, Shorebird, Firebase App Distribution, TestFlight, Google Play

Development Tools: Git, GitHub, GitLab, Postman, VS Code, Android Studio, Xcode, Antigravity

Engineering: Performance Optimization, Debugging, AI-Assisted Development, Rapid Prototyping

EDUCATION

B.Sc. in Computer and Information Technology | IT Department

Zagazig University — Zagazig, Egypt

Oct 2020 – Jul 2024

LANGUAGES

Arabic

Native
